WORK EXPERIENCE

Coverys

Boston, MA

Information Technology Intern

June 2025-August 2025

- Analyzed and updated company Regression Tests, translating to Azure DevOps for automation

Knack Tutoring, Northeastern University

Boston, MA

Peer Tutor, CS2500/1800, MATH1365

December 2024-Present

- Provided personalized instruction on program design, analytical thinking, and mathematical proofs

Northeastern Electric Racing

Boston, MA

Software Engineer - Launchpad Program

January 2025-March 2025

- Learned full-stack web development to manage real-time vehicle telemetry and club data

PROJECT EXPERIENCE

BioGPT (AI LLM) - Typescript, React, HTML/CSS

Personal

- Integrates AI-driven chat interface for tutoring AP Biology in real-time December 2024
- Developing a database-backed prompt storage system to track student performance

AI Facial Recognition/Attendance Tracker - Python

Personal

- Engineered a facial recognition system to encode and identify faces via webcam January 2025
- Implemented CSV-based data storage to log attendance records

MyBalatro (Balatro Recreation) - Typescript, React, HTML/CSS

Personal

- Developed interactive game UI via React state management/interfaces December 2024-January 2025
